Abstract of JP10200730

PROBLEM TO BE SOLVED: To generate a photo print as expected by customers at a low cost with a simple operation in the case of editing a photographic image recorded on a film to generate the print.
SOLUTION: Low resolution image data of a photographic image read from a film 1 are recorded on a recording medium 2 with a software for image edit and the medium 2 is served for a customer so that the customer itself can make edit of a photograph by using a personal computer 6 or the like. In the case of placing an order of a print, edit instruction information being a record of operations made by the customer for its edit is received from the customer in a form of the recording medium 2, a scanner 3 is used to read a film with high resolution based on the edit instruction information and image data are edited automatically and a printer 4 is used to print out the edited data.
